

HYDROCUTTER RAPTOR

- Steel or ALU-body
 - about half the weight with ALU
- More secure with serrated back knives
- Easy to mount the knives into the cutter:
 - corrugated back knives
 - only two screws / knife
 - loose one screw, tap the gib down and take out the knife
- The cutter is sealed and quieter than a usual cutter and easier to clean
- The cutter is delivered mounted and grinded with the knives you choose
 Just to put it into the moulder and start running
- Tightening torque 25 Nm (both steel and ALU)
